

## Home

- Offer fade protection for your furniture, drapes, carpets and more
- Cut annoying glare
- Reduce up to 99% of the sun's harmful ultraviolet rays
- Reduce excessive heat gain through your windows
- Provide increased comfort and energy savings
- Prevent injury from glass fragments due to crime, destructive weather and terrorism

Shut the Window on High Utility Cost:

With the increasing cost of energy this summer, homeowners will be looking for ways to reduce energy costs. Turning up the thermostat and sweating it out is not the only recourse that homeowners have to keep their money from going out the window

Most homeowners enjoy the light, solar warmth and scenery that windows provide. But during the summer, excessive heat and glare may compel you to forgo the view and draw the drapes. There is another solution: With insulating window film, you can block harsh rays and still enjoy daylight and the scenery
